

Color Solutions

The True OEM Alternative

Our color solution sets the new standard for color quality and performance. By utilizing next generation technology, high quality chemical toners and components, and proprietary robotics and automation, our cartridges provides a true alternative to the OEM.

While most aftermarket manufacturers use a conventional color toner, our cartridges are developed utilizing state-of-the art chemical toner to provide consistent quality and vibrant colors that perform as well as, or better than, an original cartridge. In addition, all color cartridges undergo Advanced Lifecycle Testing™ that includes environmental chamber testing, pre and post-production testing, and OEM benchmarking to ensure our cartridges meet or exceed OEM performance.

The Color Advantage

- Engineered and manufactured in facilities dedicated to color, resulting in the most advanced color systems on the market
- Automated manufacturing environment with centralized quality monitoring system
- Peak performance and consistent, vibrant color output
- Independently tested to meet or exceed OEM performance
- 100% IP-cleared
- 100% performance guarantee
